

Team Name: sddec21-19

Team Members: Emma Paskey, Andrew Dort, Kira Pierce, Joshua Slagle, Zachary Borchard

Report Period: early May

Summary of Progress in this Period

Each team member created a visual mockup of what we will want the application to look like. These designs were then discussed with the advisors on what changes could be made to the UI designs we all came up with.

We also completed the first iteration of our design document.

Work has begun on the infrastructure part of the application: a VM has been checked out from ETG.

Lastly, We discussed the Lotus blossom diagram with the advisors due to the group's uncertainty in creating one for our project. This diagram has been started slightly for our team.

Pending Issues

We are still slightly uncertain how we want to implement some of the features in terms of layout on the application and overall functionality. Right now we are on the first iteration of this process.

Plans for Upcoming Reporting Period

- Completion of the lotus diagram we have started and discussed with advisors
 - Finalize a design for at least the basic functionality of our software.
 - Continue meeting as a team and having our weekly meetings with our advisors.
-
